WORLD PENGUN DAY

We celebrate World Penguin Day on Apr. 25. It is a day to learn more about penguins and their problems.

We watch videos or read books about penguins.

Penguins live in the southern half of the world.

Researchers found that Adélie penguins migrate

north on Apr. 25.

That is why we celebrate World Penguin Day on this day!

TURE & SCIENCE

How Do Germs Spread?

They are everywhere around us. But they are too small to see with our eyes!

Germs enter our bodies in many ways.

We breathe in the germs in the air.

There are germs in the food and drinks we eat or drink.

> The germs on our bare hands can enter the body through the eyes, nose, or mouth.

KING MIDES AND THE GULLEN TULK

Long ago, there lived a
Greek king named Midas.
A god named Dionysus
granted him one wish.
The king said, "Let whatever
I touch turn into gold!"

The next morning, the wish came true! Midas was very happy, but not for long.

He could not eat.

The food he touched turned into gold. When he hugged his daughter, she too turned into gold!

The moral of the story: Don't be too greedy. Be happy with what you have.
